**WE REINVENTED CEMENT.**

### You are creative! Let it out...

Be your own designer! The Rayher creative cement makes it easier as ever before to create wonderful home decor pieces or a little give-away.

The secret ingredient in the recipe, which was specially developed for creative designing: The Rayher creative cement is based on plastic cement. It is contaminant-free, nearly dustless and ready to use – that is why it is so easy to use.

Made for all who want to be creative without having to carry heavy sacks or trying a lot.

### Rayher creative cement – the >carefree cement<...

Rayher creative cement is contaminant-free, nearly dustless and ready to use. It can be handled without protective clothing and you only need water to mix to start working. Being creative was never easier.

### It is this easy to start:

You do not need much, to get started: The Rayher creative cement already contains all you need. You just have to add water, mix it with the spatula and pour it into the prepared mould.

### All you need:

Rayher creative cement (1\*), water (2), spatula (3), mould of your choice (4+5) – Eventually some adhesive tape, cutter and oil, for lining and oiling the mould, sandpaper.

**\* Contaminant-free,  
nearly dustless  
and ready to use!**

### Cement yourself something beautiful...

With the Rayher creative cement it is really easy, to turn your design ideas into reality: Add water, mix, pour. Everyone can use the Rayher creative cement.

The Rayher creative cement is labeling free and dries quickly - in contrast to ordinary cement or concrete. Depending on the size, you can already deform the finished object about 3 hours after pouring the cement into the mould.

And now you can start decorating your artwork. For example with Rayher chalky finish, with Rayher deco metal or with other creative techniques. And this as well does not have to be hard or extensive. Like this wonderful decorative or give away ideas arise, that not only you will love...

#### It is so easy to mould cement:

Prepare the mould, mix the cement with water (1). Pour cement into the mould, eventually set in place the contrasting mould and weigh it down (2). After hardening thoroughly, deform the mould (3). Your Artwork can now be painted or decorated (4).

#### Inspirations:

To mould the cement you can use e.g. plastic moulding forms (1+5), paper-mâché forms (2+4), or wooden forms (3). The molds are reusable.

#### Which molds are suitable

Rayher has many different products and molding forms in the assortment, which are suitable for the creative cement. The different Rayher plastic moulding forms are ideal.

But also paper-mâché and wooden products are suitable forms. And also everything you can find in your household...

↑ Art. 71 075 00

#### Even more forms

In every household you can find objects that can be used as moulds. Just have a look!...

**Listen to the Artist in you:  
Let him concrete...**

There's no limit for your phantasy: The Rayher Creative cement is suitable for solid objects (like this planter containers) as well as for filigree motives.

## Creative design ideas

Simple basic forms are only the first step. With a little effort you can create real interesting patterns and then embellish your work.

It's enough to have sandpaper, brushes, paint and Rayher Deco metal for decorations. Let's start...

### Here's how to do it:

With sandpaper you can remove burrs, which can arise when moulding (1).

### Creative possibilities:

After moulding you can design your work just as you desire, let it be "natural cement" (6), paint it (7+9) or decorate it extravagant (8). You can get all needed products at Rayher Hobby.

## Cement becomes socially acceptable

From the practical basic commodity to real works of arts, from a present for any eventuality to a valuable designer piece – with the Rayher creativ cement everything is possible, everything is feasible.

Be your own designer. Rayher creative cement gives your phantasy a helping hand – let your imagination run wild...
